

# Installation of USB-NetLink cable under iMac

## ◆ To install the driver of USB-NetLink cable.

### Step 1.

It will show a dialog “Unknown Device”, click “Cancel” to continue.

### Step 2.

- (1) Please insert the “USB-NetLink driver” CD into CD-ROM.
- (2) Click the CD of “USB Net Installer 0605” on desktop.
- (3) Double Click “USB Net Installer 0605” in the CD.

### Step 3.

- (1) Click "Restart" to restart your system and complete the installation.

**Note:** Please make sure that the suitable AP(such as “Win Mounter-E2.0”) must be already installed if you want to use network function.

## ◆ USB device installed list as following.

If the USB-NetLink cable is installed successfully, you can move the cursor to select the icon of “Hard Disk”. Then select “System Folder”, and then select “Extensions”. It will create a new file

(1)“— USB— Net— Enabler”

(2)“— USB— Net— OTScanport”

(3)“— USB— Net— PortNameHelper” (4)“— USB— Net— StreamDriver”.
