CF Card Adapter

From now on the BT100S^{PLUS} Bluetooth CF Card supports Windows XP/2000/ME/98SE. A *CF Card Adapter* that converts the CF Card into a regular type II PCMCIA card is necessary when you use BT100S with above operating systems.

1. Plug the BT100S^{PLUS} CF Card into a CF Card Adapter.
(Note: Do not insert the CF Card Adapter into PCMCIA slot at this moment)
2. Put the *Bluetooth CF Card Software* CD into your CD-ROM and then the CD menu will show up automatically.
3. Please click on “*Install Bluetooth Software*”, then a sub menu will appear.
4. Click on “*Bluetooth Software - For Windows XP/2000/ME/98SE*”, the installation will execute automatically.
5. Plug the CF Card Adapter into PCMCIA slot after the driver installed successfully.
